EV CHARGER INSTALLATION

Commercial · ICI · Residential

Site assessment · Power · Permits · Energization

BEHIND EVERY CHARGER, FROM HOME GARAGE TO FLEET DEPOT.

SCI assesses the site, confirms capacity, upgrades service, runs conduit and feeders, handles permits and ESA inspection, and works with your charger supplier through start-up. One experienced electrical contractor and one point of contact, with trenching and civil coordinated through trusted partners.

LEVEL 2 & DC FAST	COMMERCIAL · ICI	RESIDENTIAL	ONE POINT OF CONTACT

WHERE WE INSTALL

COMMERCIAL & ICI

- **Fleet depots** yards & service centres
- **Workplace** staff & visitor parking
- **Multi-unit residential** condo & rental garages
- **Retail & hospitality** customer lots
- **Municipal & institutional** civic sites, schools, healthcare

RESIDENTIAL

- **Home Level 2 chargers** garage or driveway
- **Panel & service upgrades** when capacity is short
- **Detached garages** feeders, trenching coordinated

HOW WE WORK

01	**Assess** Site walk, charger locations, routing, existing equipment and load calculation.
02	**Power** Panel, feeder and service upgrades, coordinated with the local hydro utility.
03	**Permit** Electrical permits, ESA inspection coordination and utility paperwork.
04	**Build** Our crews run conduit, feeders and wiring for Level 2 and DC fast chargers; trenching, pads and restoration coordinated under SCI.
05	**Energize** Testing, start-up with your charger supplier, energization support and handover.

WHY SCI

Why owners, builders and charger suppliers call SCI for EV installs.

Skilled, experienced crews
Safety-focused electrical crews on every charger site.

Single point of contact
SCI manages the electrical scope and coordinates trenching and civil through trusted partners.

Hydro utility know-how
Service upgrades and coordination with local distribution companies are everyday work.

Supplier-ready installs
We work with your charger supplier or network partner on specs, mounting, schedule and start-up.

Planning EV charging?

Send us your site address, charger count and target date. We will scope the electrical work, plus any coordinated trenching, and send a clear quote.
